PROFESSIONAL SUMMARY

Automation Test Engineer with **4 years of experience** in UI and data validation testing. Proven track record in building scalable automation frameworks, improving test coverage, and reducing execution effort through optimized automation strategies. Experienced in ensuring data integrity, enhancing process efficiency, and collaborating with cross-functional teams to deliver high-quality software solutions.

SKILLS

- Domain Knowledge:** Media & Entertainment, E-Commerce, Banking & Financial Services
- Testing Methodologies:** UI Testing, Accessibility Testing, ETL Testing, FPSL Testing (Manual & Automation)
- Automation Tools & Frameworks:** Selenium WebDriver, BDD Cucumber, TestNG, Postman
- Programming & Databases:** Java, SQL, SAP HANA
- Workflow Orchestration:** Apache Airflow, Control-M
- Tools & Collaboration:** GitHub, GitLab, GitHub Copilot, Jira, Pivotal Tracker, Azure DevOps
- IDEs & Platforms:** IntelliJ IDEA, Eclipse, Browser Stack

PROFESSIONAL EXPERIENCE

Accenture 13 Sep 2024 – 02 Jun 2026 | Bengaluru, India

Role: Packaged App Development Analyst

Responsibilities:

- Developed and executed automated ETL test scripts to validate end-to-end data flow from source to target systems, ensuring data accuracy, integrity, and alignment with client requirements.
- Designed and maintained automation scripts using Java and BDD Cucumber Framework.
- Monitored ETL table load processes, investigated discrepancies, and supported root cause analysis for data quality issues, collaborating with developers, business analysts, and clients to resolve concerns.
- Automated table structure validation and mapping verification, streamlining regression testing and reducing manual effort.
- Presented test results, defect analysis, and quality metrics to clients and stakeholders, providing actionable insights to improve data processes and project outcomes.

Capgemini Technology Services India Limited

05 Apr 2022 – 11 Sep 2024 | Bengaluru, India

Role: Senior Analyst

Responsibilities:

- Developed UI automation scripts using Selenium and TestNG, integrating customized Extent Reports for comprehensive result analysis.
- Conducted functional, regression, and smoke testing across multiple browsers, improving defect detection and release quality.
- Collaborated with cross-functional teams to enhance automation, reducing testing time by 60% and improving productivity by 35%.
- Championed automation process improvements and maintained close client communication to align deliverables with project objectives.
