Address: No.21, 2nd main road, Vinayaka nagara, Kengeri
Satellite Town, Bangalore- 560060

Experience Summary

AWS Certified Cloud Practitioner and results-oriented professional with nearly 2 years of combined experience in software testing and DevOps, possessing a solid foundation in AWS cloud technologies. Aiming to excel in roles encompassing Software Testing and DevOps. Proficient in leveraging cloud technologies, testing methodologies, and DevOps practices to optimize software development and delivery lifecycles. Demonstrated ability to collaborate effectively with cross-functional teams, ensuring the delivery of high-quality solutions that align with business objectives and exceed client expectations. Eager to contribute my expertise to drive efficiency, scalability, and reliability in software development life cycle.

KEY SKILLS:

❖ Functional:

- Demonstrating a proactive attitude towards process improvements through Automation strategic enhancements.
- Demonstrated ability to interact effectively with Clients.
- Proficient in thorough requirement analysis, ensuring a comprehensive understanding of Project objectives and Client needs.
- Proficiency in working with teams, assisting in tasks, and supporting team goals.
- Ability to adjust and contribute positively to a dynamic work environment.
- Strong written and verbal communication skills for clear and concise information sharing.
- Ability to generate new ideas and drive innovation for the Project.
- Proficient in developing Automation scripts for various scenarios, resulting in significant time and cost savings.

❖ Technical Skills:

AWS Cloud and DevOps

- *AWS Cloud:* Amazon EC2, Auto scaling, Load balancers, AMI, Templates, Amazon S3, Amazon Elastic Block Store (Amazon EBS), Amazon Elastic File System (Amazon EFS), Life Cycle Policies, Amazon S3, Storage Classes, Amazon VPC, Subnets, Gateways, Network ACL's Security Groups, AWS Identity and Access Management (IAM)
- *Source code Management:* GitHub
- *CI/CD:* Jenkins
- *Orchestration Tool:* Kubernetes
- *Build Management Tool:* Maven
- *Application Server:* Tomcat, Httpd

- *Containerization Tool:* Docker
- *Configuration Management Tool:* Ansible
- *Infrastructure as code (IAC) tool:* Terraform.
- *Monitoring Tool:* Prometheus
- *Virtualization Tool:* Grafana
- *Scripting:* Shell scripting

Automation and Functional Testing

- *Programming Language:* Core Java, SQL
- *Automation Testing:* API Automation, Web Application Automation, Selenium WebDriver
- *Framework:* BDD Cucumber, TestNG, Rest Assured
- *IDE's:* Eclipse, IntelliJ
- *Tools:* Postman, Jira, Pivotal Tracker, Kafka
- *Functional Testing:* SQA Testing & Methodologies, Test Planning, Test case design, Defect/Bug Tracking, Test Strategies, Test Coverages, Backend Validation, Regression Testing

Professional Experience

1. DevOps Engineer and QA

Company:	Capgemini
Designation:	Sr Analyst / Software Engineer
Duration:	May 2023 to Present
Responsibilities:	➤ Communicating with developers for build plan. ➤ Designing, creating, and maintaining GIT repositories as per the client specifications. ➤ Implemented CI/CD using Jenkins, Docker & Kubernetes. ➤ Responsible for creating Kubernetes manifest files like daemon sets, replica sets, deployments. ➤ Experience in Kubernetes cluster setup and deploying applications in Kubernetes cluster. ➤ Worked on configuration management and containerization solutions such as Ansible, Docker. ➤ Continuous Delivery is being enabled through deployment into several environments of Test, QA, and Production using Jenkins. ➤ Worked with MAVEN build tool for building deployable artifacts. ➤ Installed and administered Nexus repository to deploy the artifacts generated by Maven and to store the dependent jars which are used during the build. ➤ Creating new jobs in Jenkins and managing the build related issues. ➤ Monitoring daily builds using continuous integration tool Jenkins. ➤ Developed and maintained test scripts for API Testing using Rest Assured and Web Application Automation using Selenium WebDriver, ensuring efficient and repeatable testing processes.

2. Quality Assurance Engineer

Company:	Capgemini
Designation:	Analyst / Software Engineer
Duration:	April 2022 to April 2023
Responsibilities:	➤ Demonstrated expertise in the development and maintenance of test scripts for API Testing via Rest Assured, along with proficiency in conducting Web Application Automation using Selenium WebDriver. ➤ Played a pivotal role in ensuring the effectiveness and consistency of testing procedures, enhancing the overall quality assurance efforts. ➤ Utilized BDD framework and TestNG to create readable and maintainable automation test scripts. ➤ Executed automated test suites using JUnit and TestNG, providing timely feedback on application quality. ➤ Maintained and updated automated test suites to adapt to changing project requirements. ➤ Demonstrated proficiency in Core Java for test script development and SQL for database testing and validation. ➤ Participated in daily Scrum meetings to discuss testing progress and resolve issues. ➤ Contributed to Test Planning, including defining test scope, objectives and strategies, ensuring alignment with Project goals. ➤ Designed comprehensive test cases to cover various scenarios, including positive, negative and boundary tests, ensuring maximum test coverage. ➤ Proficiently tracked defects, providing detailed information for developers to expedite issue resolution. ➤ Utilized SQA testing methodologies to execute test plans, identify and report defect and verify bug fixes.

Professional Development:

- Completed AWS certification – AWS Cloud Practitioner demonstrating proficiency in AWS cloud technologies and best practices.
- Undergone training on AWS cloud and DevOps from Capgemini and Micro Degree.
- Participated in professional development activities, webinars, and workshops to stay abreast of emerging trends, best practices, and advancements in cloud computing, DevOps, and software testing domains.

Accomplishments

- Received “Delivery Excellence” Award for excellent contribution towards Project (2023)

Certifications

- AWS- AWS Certified Cloud Practitioner
Validation Number: 77V6G6SBY2E1QYC7, Validate At: <https://aws.amazon.com/verification>
- Micro Degree- AWS Solutions Architect, DevOps Engineer.
- Capgemini- Automation Engineer- Level 1 QE&T Ocean Certificate, Copado Robotic Testing, EF Level 10-Upper Intermediate-CEFR-Level B2.

Higher Education

2020- Bachelor of Engineering from East West Institute of Technology affiliated to Visveswaraya Technological University, Karnataka
